LBC Compliant

Declared

MANUFACTURER RESPONSIBLE FOR LABEL ACCURACY

INTERNATIONAL LIVING FUTURE INSTITUTE™ declareproducts.com

The Declare certification is a transparency tool created to support the Living Building Challenge (LBC), sponsored by the International Living Future Institute. The LBC is a sustainability program designed around a framework to promote regenerative design to create spaces that give more to the earth than they take. This program is widely accepted to be the most advanced green building standard in the world.

The Declare label, used to identify materials that support this initiative, acts as a “nutrition label” to provide clear and informative information regarding contents. To qualify for a Declare certification, manufacturers must prove that ingredients in their materials, within 100ppm, are not harmful to the environment.

TURF Design is committed to contributing to a cleaner, greener future. We are proud to confirm that our 9mm PET panel material carries an LBC Compliant Declaration Status.

TURF’s 9mm PET panels are made with 99% recycled material, and are entirely recyclable, salvageable, and reusable.

For additional information regarding Declare labeling, please visit the International Living Future Institute site, [here](#).
